**DETAILED ACTION**

**EXAMINER'S AMENDMENT**

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Peter Zawilski on 04/24/2007.

The application has been amended as follows:

Claim 10, line 1, "as claimed in claim 7" has been replaced by -- as claimed in claim 9 --.

*Allowable Subject Matter*

Claims 3-6, 9-10 and 14 are allowed.

The following is an examiner's statement of reasons for allowance:

Claims 3-6 are allowed over the prior art of record. The prior art of record considered individually or in combination, fails to fairly teach or suggest the claimed circuit comprising, among other limitations and unobvious limitations of "a sliding bias circuit connected to another side of said differential pair for automatically modifying said quiescent current for an output

stage amplifier according to said detected RF signal input” structurally and functionally interconnected with other limitations in the manner as cited in the claims.

Claims 9-10 are allowed over the prior art of record. The prior art of record considered individually or in combination, fails to fairly teach or suggest the claimed circuit comprising, among other limitations and unobvious limitations of “a sliding bias circuit connected to another side of said differential pair for automatically modifying said quiescent current for an output stage amplifier according to said detected” structurally and functionally interconnected with other limitations in the manner as cited in the claims.

Claim 14 is allowed over the prior art of record. The prior art of record considered individually or in combination, fails to fairly teach or suggest the claimed circuit comprising, among other limitations and unobvious limitations of “wherein said second power output stage further includes means for further modifying said quiescent current at a second output stage under discrete voltage control.” structurally and functionally interconnected with other limitations in the manner as cited in the claims.

The following is a statement of reasons for the indication of allowable subject matter:

Regarding claim 6, the prior art of record considered individually or in combination, fails to fairly teach or suggest the claimed circuit comprising, among other limitations and unobvious limitations of “the first circuitry has a characteristic impedance  $ZCI = 2Zo$ ” structurally and functionally interconnected with other limitations in the manner as cited in the claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue

fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
